Subject: Microsoft Settlement

I feel that the proposed settlement offered by the DOJ does not adequately address Microsoft's ability to act in a monopolistic manner. There are far too many loopholes and terms have been too narrowly defined. If this settlement is implemented, I believe that we will see another scenario like this last one where MS acts within the legal boundary of the settlement, but still monopolizes the industry.

I urge you to review Dan Kegel's petition and implement those fixes he addresses. <http://www.kegel.com/remedy/letter.html>

Best regards,
Kendall Whitlatch
